DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 and 34-40, drawn to a method for creating a relief mold, classified in class 426, subclass 383.
- II. Claims 17-22, drawn to a relief mold, classified in class 249.
- III. Claims 23-33, drawn to an edible ink composition, classified in class 426, subclass 250.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II are related as process of making and product made. The inventions are distinct because the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the relief mold could be made by forming a three-dimensional impression in the carrier and then applying the image, rather than applying the image to the carrier prior to forming the impression as required by the claimed method.

Similarly, the edible ink composition of Group III can be used in methods other than that of Group I and with products other than that of Group II. For example the edible ink composition could be used to print directly on a cake or other food product.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
